Summary

Aspiring frontend developer with hands-on experience in building dynamic and responsive web applications using React.js, Tailwind CSS, and Redux. Proficient in JavaScript and various modern frontend technologies. Currently in the final year of a Bachelor of Computer Applications program and actively seeking opportunities to enhance skills in web development and user interface design.

Skills

Languages: JavaScript, Java, C, Python, HTML, CSS
Frameworks/Libraries: React.js, Tailwind CSS, Redux

Projects

Book Store App | *ReactJs, TailwindCss, Axios*   **Deployment** | **GitHub**
Frontend Developer

- Created a full-featured book store application using React.js with CRUD functionality to add, delete, and edit books.
- Implemented Axios for handling API requests, improving data fetching and submission for book details.
- Styled the entire application with Tailwind CSS for a responsive and modern UI design.
- Enhanced user experience with clear navigation and form validation, including real-time error feedback.

Medicine Supply Management System | *ReactJs, TailwindCSS, Axios, Socket.IO*   **GitHub**
Frontend Developer

- Built a medicine supply management system with a user-friendly interface for tracking inventory and managing orders.
- Integrated real-time communication between users and manufacturers using Socket.IO for enhanced collaboration.
- Optimized the frontend for better performance and user experience, focusing on intuitive navigation.
- Collaborated with backend developers to streamline API integration and data flow using Axios.

Recipe Router App | *ReactJs*   **Deployment** | **GitHub**
Frontend Developer

- Developed a dynamic recipe search application using React, allowing users to browse and explore various recipes.
- Implemented a feature for users to save favorite recipes, enhancing user engagement with a personalized experience.
- Designed an intuitive layout with detailed ingredient lists and cooking steps for each recipe, improving user accessibility.
- Leveraged React's component-based architecture for efficient state management and scalability.
